

# MODERN LINEAR

The brand NEW windows line

February 2023

 **Ekoplast**

# Modern LINEAR

– the brand new windows line!

## MODERN LINEAR

- BEAUTY AND SIMPLICITY IN DESIGN -

- 74 mm frame depth
- 5 chambers in sash
- 6 chambers in frame

# Modern LINEAR – more details

## 3rd CENTRAL GASKET

The third central gasket has a positive effect on the effective blocking of heat flow. It also makes your windows more safer.

## 90° GLAZING BEAD OPTICS

Simple contours add character. A wide range of glazing beads with a 90° appearance make Modern LINEAR windows a unique design. This minimalist design is a landmark in modern architecture.

## ONLY 110 MM HEIGHT

The low bending height of the frame and sash allows large and effective glazing. This increases the amount of light entering the room. Combined with other advantages, we simply achieve the ultimate window beauty!

## ONLY 4° SLOPE

Expressive like never before! The 4° rebate alone gives the window a unique timeless simplicity.

# Modern LINEAR – the major advantages

## Low profile

Minimal window profile - Minimalism in design. Only 110 mm height.

## Perfect joinery

New welding technology joins PVC profiles in an unprecedented way, eliminating imperfections.

**MODERN** LINEAR

- BEAUTY AND SIMPLICITY IN DESIGN -

## Even more warmth

Warm windows with large glazing, triple gasket and 6-chamber frame.

## RealWood®

Not just standard veneer colours. Modern LINEAR looks good in elegant premium colours - RealWood®.

## STV® Static dry glazing

The STV® static dry glazing technology involves bonding the glass and sash profile using an adhesive tape designed specifically for building windows while still being able to pack the glass as usual.

## Ecology friendly

Our shared goal is to reduce CO2 emissions. That includes using recycled materials for the inner core.
